IEC 61340-5 requires all ESD sensitive devices and assemblies to be labelled with the 'susceptibility' symbol. It is intended to identify devices and assemblies that are susceptible to ESD. It is correctly used as follows:

- on individual components and related documents to state "this device is static sensitive: do not touch without appropriate precautions"
- on assemblies and related documents to state "includes static sensitive components: take appropriate precautions"
- as part of a sign identifying an area where sensitive devices are handled, to warn all who approach that precautions are required
- Made of white woodfree machine coated midgloss paper
- Compliant with IEC 61340-5-1
- Marked with ESD susceptibility symbol
- Supplied in rolls of 1,000 individual labels
