

ESD Warning Labels

TECHNICAL DATASHEET

L005, L009, L010, L023, L036, L039

Description

Self-adhesive, paper-based ESD warning labels for components, sub-assemblies, bags, boxes, bins, etc. to give easy identification of static sensitive devices and products. (Can act as tamper-proof labels when applied to bags etc). These warning labels are yellow and black as a standard colour and feature an ESD susceptible symbol. This product is supplied in rolls of 1,000.

These labels do not have anti-static properties. They are recommended to be used with open-top metalised shielding bags to show there is a static sensitive component inside and should be handled with care.
