### 4.1 Description of first aid measures

If Inhaled	Remove to fresh air. If breathing has stopped or is labored give assisted respiration (mouth-to-mouth). Prevent aspiration of vomit. Turn victim's head to the side. Get medical attention.
In case of skin contact	Remove contaminated clothing and wipe off from skin. Wash affected area with soap and water immediately. Seek medical attention if skin irritation develops or persists.
In case of eye contact	Immediately flush eyes with plenty of water for at least 30 minutes while holding eyelids apart. Get medical attention, preferably an ophthalmologist.
If swallowed	If swallowed, call a physician immediately. Remove stomach contents by gastric suction, or induce vomiting, only as directed by medical personnel. Never give anything by mouth to an unconscious person.

### 4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in the labelling section (see section 2.2) and/or in section 11.
